

Fire Pit

Assembly Instructions

Want To Give Your New Fire Pit That Aged, Rich, Rusty Patina? Here's How!

Ingredients:

- 16 oz. Hydrogen Peroxide (Use Fresh Bottle for best results)
- 2 oz White Vinegar
- ½ Tbsp Salt

Use rubber gloves and safety goggles!

1. Mix the above ingredients in a clean spray bottle. Mix well to ensure the salt has fully dissolved.
2. Clean the fire pit thoroughly (all sides) with a good degreaser to remove any oil or dirt from the surface. NOTE: This step is not necessary but will give the best results. Allow the parts to dry completely.
3. You may assemble the fire pit or for an even patina, lay each of the metal pieces on a flat surface, then apply the solution to one side at a time.
4. Apply your first coat by lightly misting the solution over the entire surface of each part. Allow this coat to dry. You will see the rust begin to form within the first few minutes of application. Continue to apply the solution, allowing it to dry between applications until you have achieved the desired patina.
5. Allowing the solution to puddle or run will give different patterns. Happy Rusting!

Other Finishing Options

- Painted- Paint using a high temperature grill paint in a well ventilated area.
- Raw- If no finish is desired, regularly applying a thin coat of cooking oil will reduce rusting.

SAFETY INFORMATION

BEFORE USING THIS OUTDOOR FIRE PIT, MAKE SURE YOU HAVE READ, UNDERSTAND, AND ARE FOLLOWING ALL OF THE SAFETY INFORMATION PROVIDED BELOW. FAILURE TO FOLLOW THOSE INSTRUCTIONS CAN CAUSE DEATH, SERIOUS INJURY, AND/OR PROPERTY DAMAGE.

1. This appliance is for outdoor use only, and shall NOT be used in a building, garage, or any other enclosed area.
2. Always use this outdoor fire pit on a hard, level non-combustible surface such a concrete, rock or stone. An asphalt or blacktop surface may not be acceptable for this purpose. Do NOT use on wooden decks.
